Rizing JSON Adaptor

Hydrogen is an SAP Fiori-based application that provides an intuitive role-based SAP EAM UI across all devices and works offline to support maintenance activities and data collection.

Satisfying End-User Needs

Maintenance Workers	Storeroom Personnel	IT Staff
• Supports entire maintenance lifecycle • Captures data using dynamic forms • Allows document attachments	• Goods issue and receipt • Cycle counting • Purchase requisitions	• Simple Architecture • Role-based configuration • Secure by design • SAP certified

Key Features

Suitable for Every EAM Role
Role-based configuration so people only see and act on the information required

User Experience
Consistent look and feel across all devices

Flexible Forms
Create custom forms for data collection

Works Offline and Online
Perform work both online and offline

Smart Syncing
Delta synchronization to reduce sync times

Integration Out of the Box
Supports key PM and MM functionality to enable field work

Benefits

Immediate productivity. Reduce training and increase user adoption with consistent screens across devices.

Works where you work. Capture issues when found, even when offline.

Low cost of ownership. Lower support costs with no middleware and a single solution for mobile and desktop.

Flexible user experience. Role-based configuration allows users to focus on just the information they need.

Fast time to value. Implement in weeks, not months.

Available on SAP Store

Streamline your EAM work processes with Hydrogen
