

## EAM Assessments

Enterprise Asset Management with SAP

Are you harnessing its true power or settling for less?

*Your Journey.  
Your Way.*

*Unlock the Full Potential of Your Assets with Rizing*

Discovery

Evaluation

Recommendation

1

### Discovery Phase

- Understand your needs and challenges
- Review your existing SAP landscape
- Identify key components and their alignment with S/4HANA
- Assess data model and maintenance processes
- Review system integration and IT requirements

2

### Evaluation Phase

- Analyse collected data
- Identify misalignments and customisation
- Assess data model and compatibility
- Review integration points

3

### Recommendation Phase

- Provide actionable alignment recommendations
- Prioritise changes for impact and effort
- Identify "Quick Wins" and streamline processes
- Offer solutions for customisations
- Incorporate industry best practices

## EAM Assessment Benefits

### Making better decisions due to better system use

Identify gaps in your current EAM processes and systems and confirm recommendations for improvement. This will lead to better decision-making and improved asset management operations.

### Increase user acceptance

Align your business goals and processes. This can help increase user acceptance of the system, leading to more efficient and effective asset management operations.

### Better leverage of investment

Identify areas where you can better leverage your investment in your EAM system, resulting in cost savings and increased efficiencies.

### Leverage the latest capabilities of SAP

Identify any unused capabilities available in your EAM system, allowing you to leverage these capabilities to improve your asset management operations.

### System alignment to strategy and process

Ensure that your EAM system is aligned with your overall business strategy and processes, resulting in more efficient and effective asset management operations.

### Landscape Optimisation

Optimize your EAM landscape, ensuring that you are utilising the most appropriate tools and technologies to support your asset management operations.

### Alignment with best practice

Help ensure that your EAM system is aligned with the best industry practice for asset management, providing a framework for managing your assets in a sustainable and cost-effective manner.

## Assessment Add-Ons
